Underfloor heating products

Amuheat Floor Heating Products & Accessories

Amuheat Underfloor Heating ProductsCable Mat (in-screed under tile) High performance-low energy design. Amuheat's popular tile floor heating system. Free-form cable attached to a fibreglass mat for in-screed installations. Easily configured on site for any room layout. More about Cable Mat
Thin Cable Mat (in-tile adhesive) Low wattage on demand floor heating system. Suits renovations with floor build height restrictions as it does not raise floor levels. Features an ultra-thin electric heating cable design for above slab/screed in-tile adhesive installations. More about Thin Cable Mat
Laminate Panel 14 (under carpet)
Laminate Panel 14' 2mm heating element does not add height to the floor, and is not felt through the carpet. Installed directly between the carpet and underlay.More about Laminate Panel 14
Carbon Heat (under timber)
Innovative heating system that is made with gravure printing of heat generating carbon tissue on PET Film and copper busbar which emits far infrared rays for use under timber hardwood floors.
More about Carbon Heat
Slab Heat Cable (in polished concrete)For connection to off-peak. Popular for polished concrete floors. For new constructions and renovations as an in-slab heating system. More about Slab Heat Cable
Speedfit Hydronic (in-screed under tile or in polished concrete)Features a 15mm hydronic PEX pipes set out on top of insulation or clipped to the reinforcing steel before the sand cement screed covers the pipe.
