Amuheat Floor Heating Product Range
Under Tile & Stone Floor Heating

The Cable Mat floor heating system is suited for in tile-adhesive, thinset or in-screed floor heating applications directly beneath tile, stone, floating and timber floor finishes. Suitable sub-floors include concrete slabs, suspended timber, F/C sheet floors or existing tiles.

Under Carpet Floor Heating

Purposely designed for under carpet with a quick heating response time, the 1mm thin under carpet heating panel is installed on the underlay directly beneath the carpet - perfect for retrofit and/or renovations as there are no screeds raising floor levels.

Hydronic Under Floor Heating

Modern hydronic underfloor heating systems using gas, solar or geothermal heat pumps, integrate high tech plastic pipe either within or just below the floor finish. The Amuheat Speedfit underfloor heating system is suitable for almost any floor finish including ceramic tiles, carpet, vinyl and laminate.
