

Amuheat Products

WHY CHOOSE Amuheat FLOOR HEATING?

Amuheat is a clean and noiseless heating system, which is installed to provide energy efficient zone heating controlled using programmable thermostats to regulate the heat levels of zones in use.

Zone heating can produce energy savings of more than 20% compared to heating both occupied and unoccupied rooms of your house. Furthermore, the energy saving alternative to fan forced air heating, heat pumps and heating panels running throughout the entire house help reduce the homes overall energy consumption.

Amuheat also helps create a healthier home as the heating system does not emit VOC's and does not generate any dust or air pollutants. The system is also safe from shock hazards and does not emit any EMR. And because Amuheat has no moving parts, once it is installed it offers maintenance free usage for the lifetime of your floors.

The preferred choice in creating a comfortable, healthy way to warm your home or office, Amuheat meets the heating needs of the present without compromising the ability of future generations to meet their own heating needs.
